Floppy Sprinkler

Rain on Demand

Micro-System

FEATURES

1. Umbrella pattern
2. Aesthetically pleasing
3. The Floppy Micro-sprinkler System is versatile
4. Small rain-like droplets
5. Low pressure sprinkler system
6. Equipped with a built-in flow control regulator
7. The Floppy sprinkler has no hammer or splash plate
8. Robust design
9. All parts are replaceable
10. No movable parts
11. No reactionary forces

BENEFITS

- ✓ The unique distribution pattern offers complete coverage.
- ✓ Due to the low operating pressure of 1.5 bar substantial energy saving is possible.
- ✓ Water saving - 2mm rain-like droplets ensures extraordinary high application efficiency.
- ✓ The flow control regulator maintains a constant stream of water exiting the sprinkler.
- ✓ The flow control regulator ensures that the sprinkler can be installed on different levels without an altering in the water discharge.
- ✓ The micro system is used for many applications - Nurseries, Gardens, under canopy irrigation, cooling of plants.
- ✓ The Floppy sprinkler has no moving parts, resulting in no wear and tear.
- ✓ All Floppy sprinklers have a 5-year warranty.

TECHNICAL DATA

- Recommended sprinkler spacing 5m x 5m
- 5m Radius
- 250 liter per hour discharge
- Required water pressure 1.5 - 4 bar
- ½ Inch Male screw-in

Under-canopy
